FOREIGN TRADE 13 employee
(ensuring the import of machinery and spare parts from abroad)

Mechanization of Livestock Production Division

The Livestock Mechanization Division (LMD) provides supplies for livestock production, especially of cattle. It is part of the LUKROM Ltd. since 2004.

The LMD provides comprehensive supplies of agricultural buildings - new buildings and also reconstructions. Since the year 2009 a Metal Production center is a part of the division. The main activity of the center is the production of steel halls, roofs and metal parts of stable technologies.

In 2019, LUKROM milk, Ltd merged. to LUKROM, Ltd, which created a new center - Division of Mechanization of Animal Production in Pelhřimov. This division focuses on the production of AGROMILK brand milking parlors and the import of milking technology from the Israeli company AFIMILK..

Primary Production

During its tenure, LUKROM Ltd. has founded or invested capital in a number of enterprises engaged in crop and livestock production.

On an area of approximately 15 thousand hectares, traditional cereals and oilseeds are cultivated and a large part also forms permanent grassland. Most of the cultivated area is located in Southern and Central Moravia.

The total number of cows to market milk production is around 1600 pieces. The total number of pigs within the entire group is around 30 thousand units per year.
